

Jamal Ali

Web Developer

I am a graduated Software Engineer with extensive experience in web development and various programming languages. Skilled in MERN Stack development, I create dynamic, interactive, and pixel-perfect web applications. My expertise includes state management, hooks, props, drilling, destructuring, DOM manipulation, conditional rendering, component architecture, Context API, Redux Toolkit, Fetching API and Axios. I am proficient in HTML, CSS, JavaScript ES6, the DOM and asynchronous operations for dynamic websites. With strong knowledge of Node.js, Express.js, and MongoDB, I excel at converting UX/UI designs into pixel-perfect web pages. Additionally, I am experienced in version control with GitHub, Vercel, and Netlify, and have a solid background in WordPress development, including plugins, templates, themes, and Elementor.

PERSONAL PROJECTS

FIND MY TUTOR(Using MERN Stack)

- "Find My Tutor" is a web application that connects students with tutors. Users can search by subject, experience, location, and availability to find the best match for their learning needs.

Point of Sale

- A Point of Sale (POS) system manages sales, tracks inventory, processes payments, and generates reports, streamlining operations for retail and restaurant businesses.

E-Commerce Site(using WordPress)

- An E-commerce clothing shop allows customers to browse and buy apparel online, offering detailed product info, secure payments, and home delivery for convenience.

Real Estate Site

- A real estate site helps users browse property listings, view details, and connect with agents. It simplifies finding, buying, or renting homes and commercial spaces.

CERTIFICATES

Front-End Development, from Coursera.

MERN-Stack web Development, from IBA SUKKUR.

WordPress & Graphic Design from DigiSkill.
