Profile

Graduated as a Software Engineer. I have Specialty in Various Programming languages and in Web Development.where i well versed with React.js & Node.js which is used in creating responsive and interactive dynamic web applications. I additionally work with Software Development LifeCycle (SDLC) process and handle Software Project Management (SPM) that is used to efficiently and effectively track various projects as well as online promotion techniques. My understandings of version control are up to standards and have been applied in making responsive websites, which accurately replicate UX/UI designs on web pages. For business growth and success, flow of ideas should be enhanced within the businesses and drive success using creative technology, I offer custom digital solutions.

WORK EXPERIENCE

Web Developer, Increative Solutions(Remote)   **Aug 2024 - OCT 2024**

- As a web developer, I design and build responsive websites using HTML, CSS, JavaScript, and React.js and Node js. I handle both front-end and back-end tasks, ensuring smooth functionality and user-friendly interfaces. I also customize WordPress sites, troubleshoot issues, and optimize performance. Additionally, I collaborate with clients to deliver tailored solutions and use GitHub for code management and version control.

Intership, Internee.pk   **Mar 2024 - April 2024**

- During my two-month internship, I worked on a Front-end project using HTML, CSS, and JavaScript, where I gained valuable knowledge and enhanced my web development skills. My strength lies in programming, and I aim to continue honing these skills over time.

EDUCATION

Bachelor of Science in Software Engineering   **Jan 2020 - Jan 2024**

University of Sindh Jamshoro
- Specialization in Software Engineering & Development Process.
- Thesis on fully dynamic "Web Application" a Online Plattform ".
